Weigh-In-Motion System Installation Training Guide for Partners

We are an authorised representative of Intercomp Company, a leading manufacturer of load sensors.

The company conducts comprehensive training programs aimed at equipping local partners with the necessary expertise and skills for proficiently installing and managing specialized WIM system. These training sessions cover a wide range of topics, including technical aspects of WIM system installation, troubleshooting, maintenance. Through these training initiatives, the APM PRO empowers its local partners to effectively deploy and support advanced system solutions, thereby ensuring optimal performance and customer satisfaction.

We provide training in the installation and commissioning of a WIM system. This includes design, selection of WIM station locations in terms of technical requirements, equipment selection, configuration and commissioning of WIM stations.

We also advise on the centralisation of weighing station services.
